CHOOSE THE FINISHED PANEL

From swatch to sample

Shortlist your decors, then confirm the finish and the panel system for your project.

Onyx Honey / High gloss / 3 faces

Decorative film

Standard panel faces use random vertical cuts of the film. The pattern starts at a different point on each face. Face counts refer to pattern variations.

Direct digital print

For a premium continuous design, we print the artwork directly onto the panel without decorative film. Approve the panel sequence and joint positions together.

Request a sample

Send your decor names, destination market and application. Confirm the selected panel, joint and sealing system for shower projects.
